iHub Africa

Full Stack Web Development

Johannesburg

March – September

Zaio Institute Of Technology

Full Stack Web Developer Bootcamp

Cape Town

April – October

Ekurhuleni West College

Mechanical Engineering N4-N6

Germiston

June 2021 – October 2022

EXPERIENCE

Tirisano Cellular Insurance

Technician/Quality Contoller

February 2023 – June 2024

Boksburg

- Diagnosed and repaired mobile phones at Tirisano Cell, using Excel, Samsung Members, and Huawei HiSuite to track faults, update software, and verify quality.
- Verified part compatibility by model/specs and tracked stock in Excel to avoid incompatible orders and support smoother repair turnaround.
- Performed QC on refurbished devices using functional tests for battery, camera, sensors, connectivity, and hardware against quality standards, logging results and rework issues.
- Tested devices and ensured fault-free operation before delivery
- Documented issues and completed follow-up maintenance as needed

PROJECTS

[Airbnb Clone](#) / React, HTML, CSS, Backend

- Full-stack Airbnb-inspired web application built with React,
- Featuring user authentication, accommodation listings, and reservation management.

[Google Keep Clone](#) / HTML, CSS, Javascript, React

- Created reusable React components for a clean and maintainable codebase.
- Implemented functionality to create, view, and delete notes.
- Managed application state using React Hooks (useState).
- Designed a responsive user interface with HTML and CSS for desktop and mobile devices.

[Book Library](#) / React, HTML, CSS, Open Library API

- Developed a custom React Hook to fetch and display book data.
- Implemented search, pagination, and loading/error handling for a smooth user experience.
- Used React Hooks, HTML, CSS, Git, and GitHub to build and manage the project.
